

# BRIDGE

## ARCH SUPPORT

### FULL LENGTH ORTHOTICS

## Model 484

The Bridge is the newest orthotic insole in the Sher™ brand line of professional orthotic and footcare products. It provides the ultimate in arch support with our firmest rigid support shells. Shells are anatomically designed with a higher arch shape and a deep molded heel cup.

**Indicated for:** Plantar or Arch Pain, Plantar Fasciitis, Shin Splints, Arch Support, Fallen or High Arches, Forefoot Pain and Calluses, and Lower Back, Leg and Foot Pain and Fatigue.

### FEATURES:

**Rigid Arch Support** - Anatomically designed rigid polypropylene plastic shells provide the ultimate in long lasting arch support. Shaped with a wider overall width and a higher arch support curve.

**Molded Heel Cup** - Plastic support shells are molded with a deep heel cup giving better motion control and foot stabilization.

**Tri-Laminate Top Cover** - Durable EVA base with cushioning Poron middle layer is covered with a breathable polyester fabric for comfortable long term wear.

**Padded Heel** - Extra Poron cushioning material in tear drop shaped heel area helps reduce the pain and discomfort from heel strike.

**Non-Skid Heel** - Support shells have a non-skid bottom heel to help hold the orthotic in place.
